

## Database Entry ID: 71

**Title:** DoorSine / Digital Assistant for Staff Office Door

**Name:** Knut S L Blakkestad

**Reg No:** 1904341

### **Location:**

*The aim of the project was to create a digital assistant for an office door that would allow the owner to communicate and display information to anyone outside their office.*

*Several similar products exist on the market, but they are more focused on managing entire workspaces.*

*What makes this project stand out is that it is aimed at managing offices for individuals, rather than managing workspaces and rooms for corporations.*

*It can be utilised by as few as a single office worker, and by as many as an entire corporation.*

*The impact the project has is that it shrinks the time it takes to communicate with i.e. a lecturer from a day or two via email, to a quick message or a call.*

*It also makes booking meetings and getting up to date information accessible and easy.*

*I have learned so much during this project, and have had the opportunity to grow as a data scientist using the newest technology in app development.*
